

AVENUES PET CLINIC

RELEASE TO BOARD MY PET

Avenues Pet Clinic requires annual vaccinations on all animals boarded at our clinic.

1. Cat: feline distemper, rhinotrachetis, calicivirus and rabies. Although not required, we recommend that your cat be vaccinated for feline leukemia.
2. Dog: canine distemper, canine parvovirus, Bordetella (kennel cough) and rabies.

If my pets vaccines are over one year old, I understand that my pet will be examined and vaccines updated on arrival in the hospital area, and I will be charged accordingly.

I understand that boarding my pet places it at increased risk for stress-related illness, due to separation from his/her family. While all the preventative measures are taken to minimize these risks, in the event illness does occur, I give permission for any necessary treatment. If my pet is at risk of bodily injury due to his/her anxiety (excessive barking, pawing or rubbing face at the cage door, etc.), I give the doctors permission to tranquilize as necessary; I agree to pay all associated expenses.

I will be picking up my pet on _____

Emergency phone number I can be reached at is _____

My pet is on the following medication(s), which need to be given.
